EL QUINTO DOMINIO

[OBJ:OBJ]

“actions by a nation-state to
penetrate another nation's computers
or networks for the purposes of
causing damage or disruption.”

— R. Clark

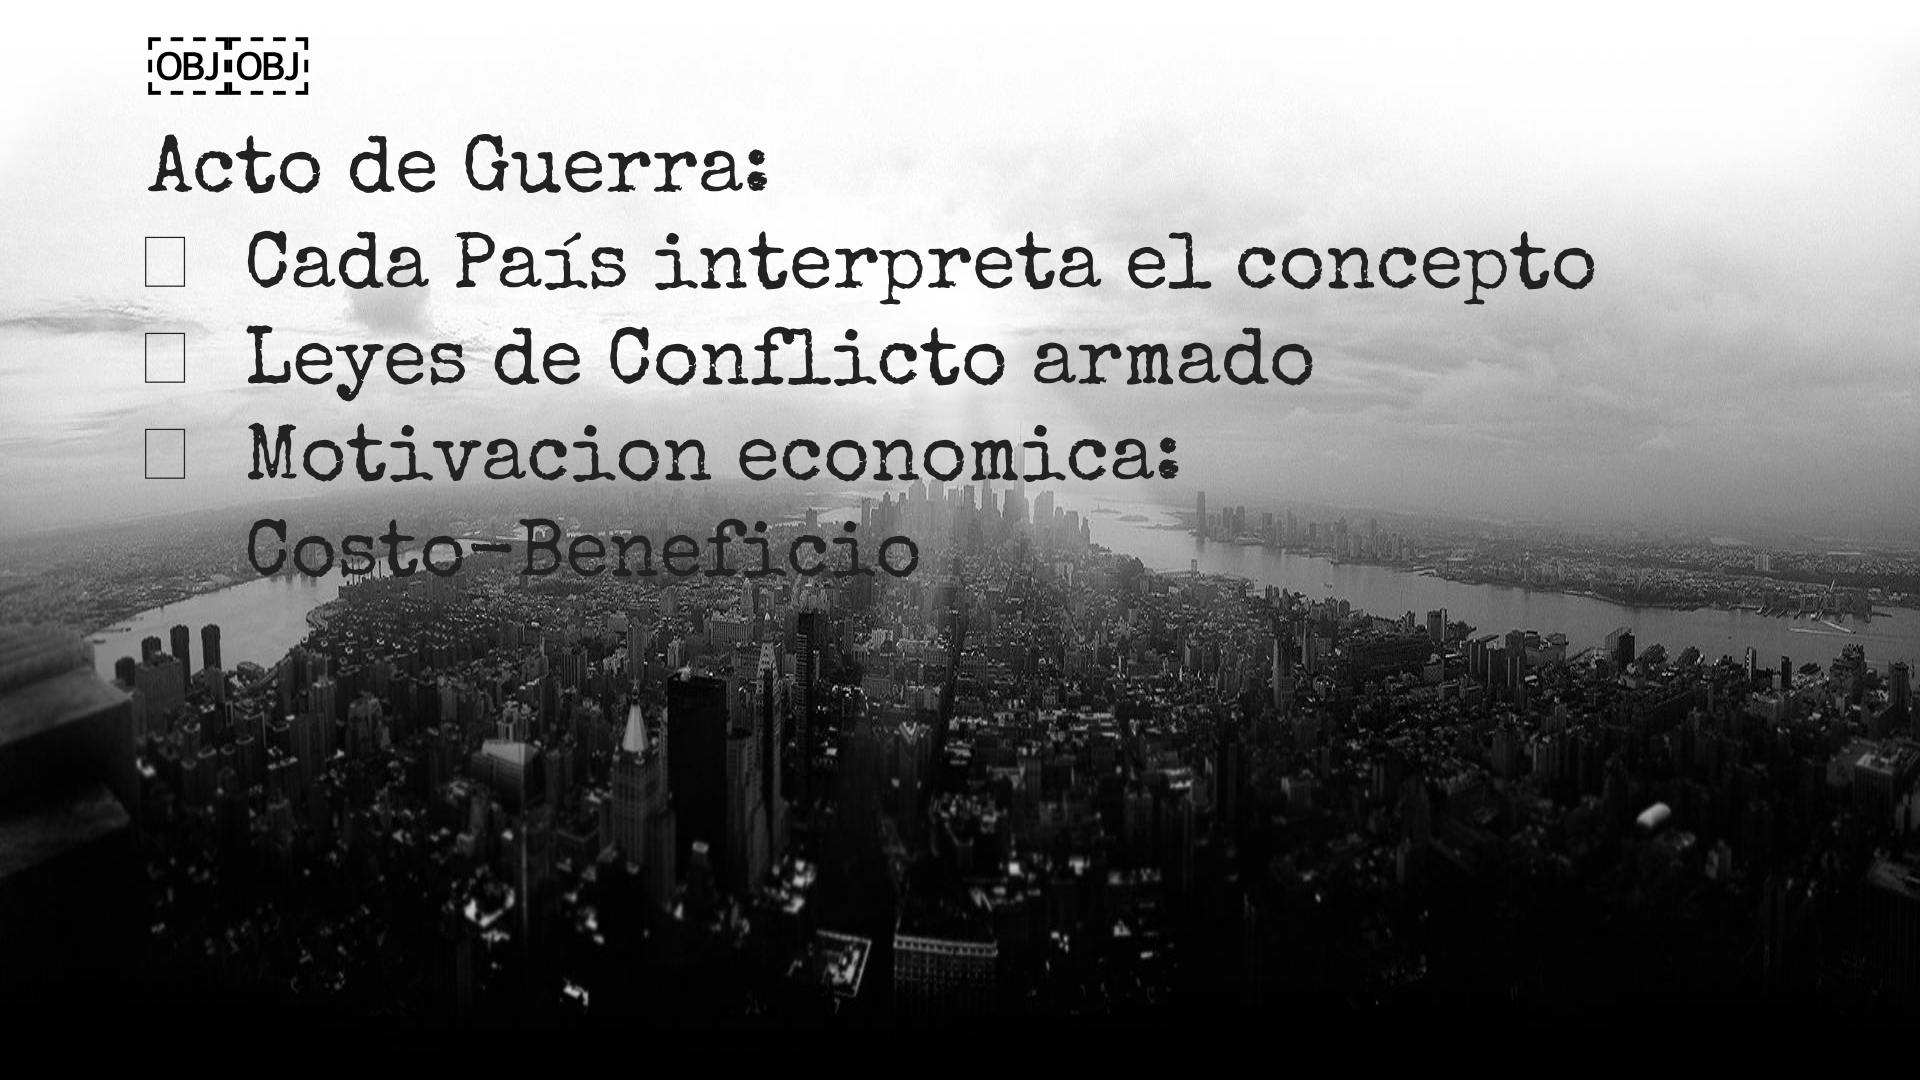

[OBJ] [OBJ]

Acto de Guerra:

- ☐ Cada País interpreta el concepto
- ☐ Leyes de Conflicto armado
- ☐ Motivacion economica:

Costo-Beneficio

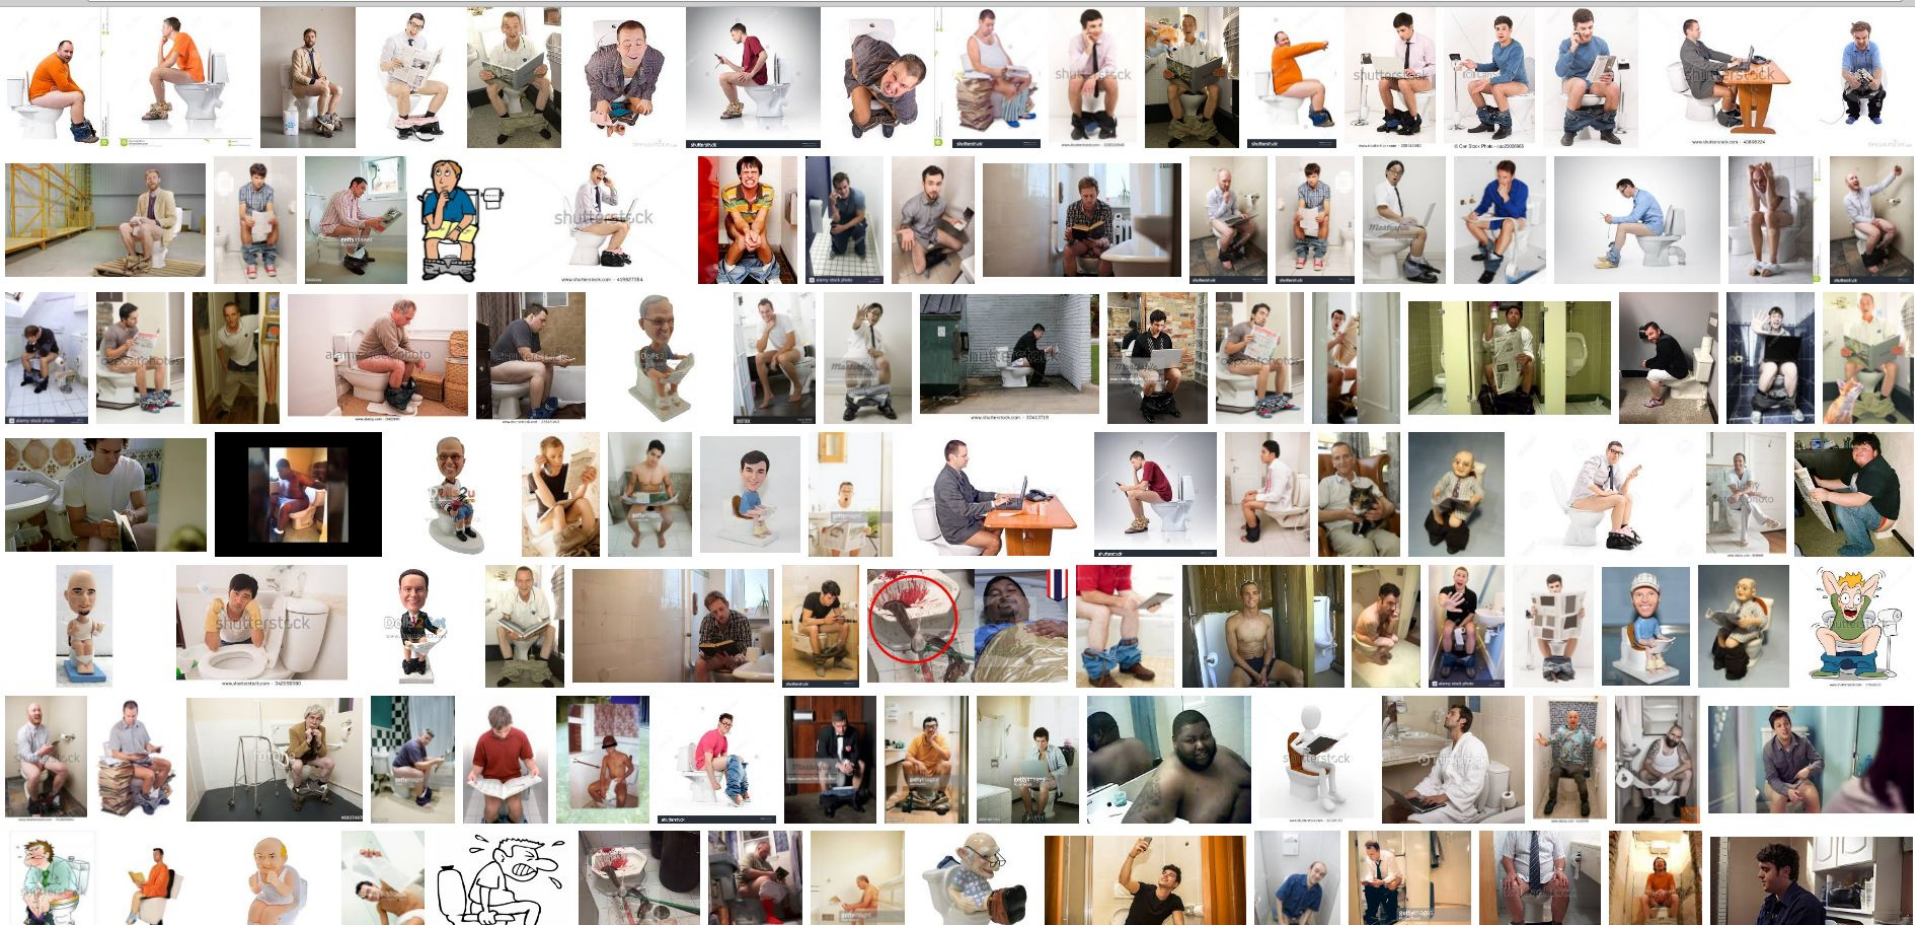

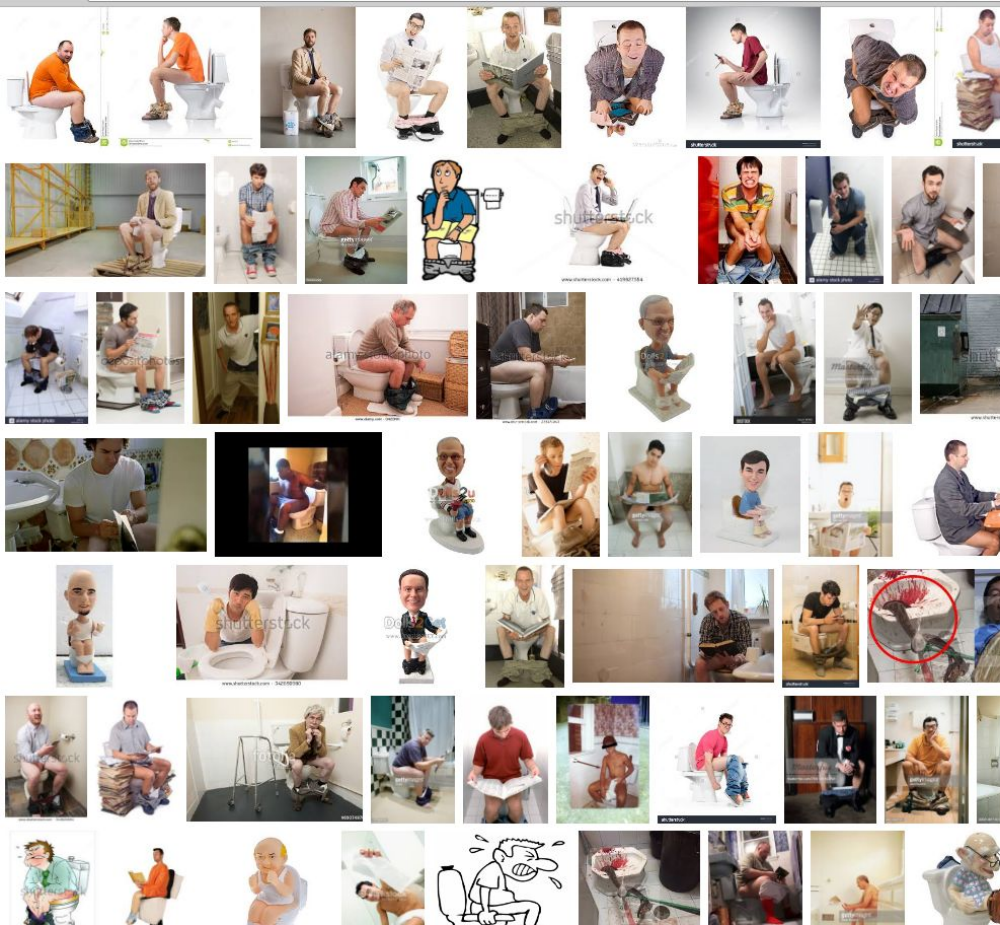

A black and white photograph of a vintage movie camera. The camera is shown from a side-on perspective, with its various mechanical components like the lens, viewfinder, and film magazine visible. The image is slightly out of focus, emphasizing the mechanical details. Overlaid on the center of the image is the word "CINETICO" in a large, white, stylized, hand-drawn font. The letters are bold and have a slightly irregular, artistic feel. The background is dark and blurry, showing more of the camera's body and some mechanical parts.

TARGETING MANTENIMIENTO ANALISIS

A black and white photograph of a large industrial facility, likely a refinery or chemical plant. The image shows a dense array of tall, vertical cylindrical storage tanks or distillation columns. These tanks are interconnected by a complex network of pipes, valves, and structural steel frameworks. The perspective is from a low angle, looking down a long aisle formed by the rows of tanks, which creates a strong sense of depth and scale. The lighting is dramatic, with bright highlights on the tanks and deep shadows in the surrounding structure, emphasizing the industrial and somewhat somber atmosphere.

Yes and no

Yes it with absorb the liquid, but no that's not what you want to do. The slower add process and stirring causes the rice to give up it's starch which gives the risotto it's creamy consistency. You won't get that if you dump all that liquid at once.

On Sep 18, 2015 6:28 PM, "Peter Huffman" <peter_huffman@yahoo.com> wrote:

Just pick up phone and hang it up. And leave it hung up.

BREAKING: CIA preparing for possible cyber strike against Russia amid alleged election interference - @NBCNews

The CIA is prepping a possible cyber strike against Russia

The retaliation for Russia's attacks on the U.S. election, if launched, would harass and "embarrass" the Russians.

~~TOP SECRET//COMINT//REL TO USA, AUS, CAN GBR, NZL~~

(S) The typewriter bugs marked a new level of sophistication because they were electromechanical. For the first time, the Soviets gathered information from a piece of equipment that held written plain text information. Prior to the discovery of these bugs, the U.S. believed that the Russians had only used room audio bugs with microphones or listening devices to eavesdrop on American embassy activities. As a totalitarian society, the Soviet Union valued eavesdropping and thus developed ingenious methods to accomplish it.

(U//FOUO) The 1980s were a period of strained relations between the U.S. and the Soviet Union. One manifestation of those strains was Project GUNMAN, which involved the replacement of U.S. embassy equipment in Moscow and the discovery and evaluation of typewriter bugs. GUNMAN was not the only threat to the U.S. embassy in Moscow. The U.S. began to build a new office for its Moscow embassy in 1979. The building, however, was riddled with bugs, and the U.S. eventually rejected it. That story, however, is a subject for another paper. This paper is the story of the GUNMAN attack and the role of NSA in its

OGA

etrated typewriters in the U.S. embassy in Moscow was correct in that the attack took place. However, some of the details in the report were oversimplified. According to CBS, "the bugs might still be in place had it not been for a warning from a friendly government whose own embassy had been the target of a similar eavesdropping operation."³
