# GENERAL INFORMATION

#### Objetives:

- Train and educate in the latest techniques to combat cybercrime, incident management, and cybersecurity legislation.
- Improve coordination in incident and cybercrime management.
- Promote international collaboration and expert networking.
- Foster cooperation among law enforcement agencies, regulators, judges, and prosecutors in cybersecurity. Practical format.

## Languages:

- Spanish: All tracks.
- English: CSIRT or CERT (basic and advanced level) and Policy Makers.
- French: Policy Makers.
- For the FFCCS and CSIRT or CERT tracks, two levels of difficulty are established: basic or advanced.
- International event, free of charge.
- Exclusive, cutting-edge training of the highest quality.
- Novel issues and the **most recent** trends in detecting cybercrimes.
- Practical workshops given by the best professionals.
- High-level networking opportunity with the attendees.

# Target Audience:

- Law Enforcement Agencies (LEAs): Members of Law Enforcement Agencies that work in operational units relating to cybersecurity.
- **CSIRT or CERTS:** Technical personnel who work in Incident Response Centres.
- Public Prosecutors: Active personnel from public prosecutors' offices who work on cybercrime or cybersecurity cases.
- Judges and Magistrates: Active personnel from judicial or tax authorities, magistrates and State's attorneys who work on cybercrime or cybersecurity cases.
- Policy Maker: Political actors, regulators, and cybersecurity policy developers.

# **■ EVENT CHARACTERISTICS**

International training programme specialising in cybersecurity:

#### 5 different tracks

## 220 teaching hours

- 40-hour program for law enforcement officers working in cybersecurity-related operational units.
- 40-hour program in Spanish for technical staff in security incident response centers (CSIRT).
- 40-hour program in English for technical staff in security incident response centers (CSIRT).
- 20-hour program for active members of the judiciary.
- 20-hour program for active members of the prosecution service.
- 40-hour program for personnel from regulatory or legislative bodies working on legal and regulatory aspects of cybersecurity (*policy makers*).
- \* Hours are indicative and subject to modification.
- Workshops given by **leading experts** on relevant and current issues for each of the 5 specialisations.

# **■ TRAINING PROGRAMMES\***

#### Law enforcement agencies (LEAs):

The cybersecurity track for security forces covers different areas that are crucial for combating cybercrime. Includes subjects like OSINT for police investigations, use of AI by cybercriminals and a series of current issues. This training will provide professionals with the skills necessary to tackle the current digital threats and protect society.

#### **CSIRT operations:**

Our specialised cybersecurity track for CSIRT/ CERTA team develops essential areas like cyberpatrol techniques, incident response, threat detection and monitoring, a broad training programme for tackling cybercrime challenges with the best practices and tools in the sector.

#### **Judges' Programme:**

The cybersecurity track designed exclusively for judges, a pioneering initiative that provided deep understanding of the complexities of cybercrime and gives professionals the right to tackle these challenges in the judicial system. Through a practical and updated focus, this course covers crucial issues that allow judges to acquire the knowledge they need to tackle cybercrime efficiently.

#### **Prosecutors' Programme:**

The cybersecurity programme designed for prosecutors is a unique opportunity to improve skills to tackle cybercrime in the legal system. This track offers an integrated approach that develops the knowledge needed to successfully tackle the challenges of the digital word.

# Programme for *Policy Makers* and Cyberdiplomats:

This programme provides participants with the tools and knowledge necessary to develop effective policies and strategies in cybersecurity, and to promote international cooperation and the creation of skills in this field that is so important to national and global security.

### OTHER ACTIVITIES

- Activities to promote networking among attendees and the need for collaboration among them:
  - **Role Play:** practical and collaborative cases in which profiles from the different specialities participate and give their point of view in order to resolve an incident.
  - **Practical Workshops:** offering realistic cybersecurity crisis situations, where participants must make quick, effective decisions to manage the situation, This includes coordination with other government agencies, communications with the public and strategic decision making in real time.
  - **Leisure activities:** guided tours of the city of León and visits to the most emblematic monuments, promoting the dissemination of the activities on social networks.

## RESULTS OF 2024 EDITION

- Record participation: 418 attendees from 35 countries.
- Trilingual training: Spanish, English, and French.
- Over 100 speakers and 8 international keynotes.
- Highlighted activities:
  - Cyber crisis simulations.
  - Collaborative role-plays.
  - Expert talks on artificial intelligence, digital forensics, cryptocurrencies, and cybersecurity regulation.
  - PassVRoad: Immersive virtual reality experience.
